Later he discover that are alternates futures where them failed to protect the world (in one of them Ara takes the world ruled by candy, an extra) the all-knowledge Rein is a time traveler, using the Nue system she had returned thousand of times trying to change this fate.

The three enemy faction (Enigma, Shining Eye and the Genma Clan) join forces to shearch the Fragment of god to open the gate and DEM II reveal itself. HEY...

You're probably wondering why I only uploaded the two last chapters...
Well, my Japanese is null and my English... well, is okay but I wanted that the last two chapters were available, so I did it.
Of course, if one day some scanlation continues it, I will gladly delete them so you can enjoy a better translation.

And sorry, as I said before, I don't know Japanese,
these two chapters were a torture to translate,
so I can't do more an apology
